Profile

Technical Writer with 6+ years of experience across SaaS, enterprise, and AI-driven environments. Skilled at structuring content for both human readability and AI retrieval, with hands-on experience in knowledge base migration, product documentation, and SEO-optimised content. Background spanning software development, technical education, and content strategy — bringing both technical depth and clear communication to every documentation ecosystem I support.

Core Competencies

- Languages: HTML, CSS, Core Java, SQL, Python (data processing, scripting)
- Data Processing: Regular Expressions (Regex), CSV manipulation, data structures, Markdown
- Version Control & Tools: Git, Jira, Notion, Confluence, SharePoint
- Data Annotation & Quality
 - Multi-Modal Annotation: Image labeling, text classification, content markup, data validation
 - Quality Assurance: Dataset auditing, error pattern analysis, inter-annotator agreement, compliance verification
- Process Improvement: Workflow optimization, SOP development, edge case identification
- Technical Documentation & Content
 - Documentation: User Guides, API Documentation, Knowledge Base Articles, Release Notes, Training Materials, Docs-as-code
 - Authoring Tools: XML/DITA, CMS, WordPress, Oxygen XML, Zoho Writer, Grammarly, Readme.io, Docusaurus
 - Documentation Lifecycle Management: SDLC, DDLIC integration, structured writing standards
- Content & Analytics
 - Content Strategy: SEO & Keyword Research, A/B Testing, Performance Tracking
 - Analytics Tools: Google Analytics, Google Search Console, Ahrefs
- Collaboration & Project Management
 - Platforms: Jira, Zoho CRM, Microsoft Office Suite, Site24x7
 - Cross-Functional Collaboration: Agile/Scrum environments, stakeholder management, compliance standards

Experience

SENIOR TECHNICAL WRITER | LIGHTCAST | JAN 2026 – FEB 2026

- Developed clear, structured documentation for internal processes, SOPs, and user guides, ensuring accuracy, consistency, and usability across teams.
- Mentored technical writers, established documentation standards, style guides, and templates, and reviewed and approved team-authored content.
- Managed documentation library organization, naming standards, versioning, and access, ensuring all content remained easily searchable and consistently structured.

- Conducted interviews with SMEs and process owners to capture workflow details, decision points, and system usage, translating inputs into step-by-step operational guides.

DATA ANNOTATION SPECIALIST | IMERIT | SEP 2025 – DEC 2025

- Image & Content Annotation: Perform precise labeling and classification of images and textbased data according to client-specific project guidelines.
- Quality Assurance & Auditing: Conduct regular audits on annotated datasets to verify compliance with quality standards and identify potential inconsistencies or gaps.
- Process Improvement: Analyze error patterns, edge cases, and recurring issues to refine workflows, enhance annotation accuracy, and boost team efficiency.
- Documentation & Guidelines: Maintain and update clear annotation instructions, ensuring all team members follow standardized procedures.
- Collaboration & Training: Work closely with project managers and annotators on requirements, feedback, and training.
- Performance Reporting: Track and report quality metrics, summarize insights, and recommend improvements for sustainable project performance.

CONTENT WRITER | ZOHO | SEP 2025 – DEC 2025

- Created and maintained end-to-end product documentation including getting started guides, FAQs, help articles, release notes, blogs, and eBooks
- Improved search performance of 15+ landing pages using SEO and GEO best practices, leveraging keyword insights from Google Search Console and Ahrefs.
- Boosted Google search ranking of 2 landing pages by over 78%, significantly increasing organic visibility, traffic, and signups.
- Published 50+ blogs and various other written articles.
- Optimized content structure and usability, improving discoverability and engagement across knowledge and marketing assets
- Collaborated with product, design, and customer-facing teams to develop comparison sheets, webinar content, and sales enablement materials
- Partnered with customer success teams to create support-oriented content that enhanced user understanding and self-service capabilities
- Reviewed and refined content using editorial standards and QA tools to ensure clarity, consistency, and accuracy
- Analyzed content performance and user behavior to improve content effectiveness and user experience
- Piloted AI tools in documentation workflows, improving content delivery efficiency by 20%

CONTENT CREATOR | FITTR | JUN 2023 – MAR 2024

- Created high-engagement, SEO-optimized content on nutrition and wellness, boosting platform visibility and organic traffic through data-driven content strategies.
- Led digital campaigns and client engagement initiatives—including influencer collaborations, online workshops, and productivity tools—resulting in improved retention and efficiency.

CONTENT CREATOR | FREELANCE | JUN 2022 – MAR 2023

- Conducted A/B testing and performance tracking, analyzing content metrics to optimize engagement and conversion rates.

- Developed engaging educational social media content (meal guides, blogs, and resources) to build client awareness and promote healthy lifestyle practices.

SYSTEMS ENGINEER | INFOSYS | JUNE 2012 – MAR 2013

- Analyzed, developed, modified, and debugged an existing full stack mobile application and provided inputs for development and enhancement.
- Developed a mobile web application using HTML5 and CSS.
- Interfaced with clients and project architects to ensure development is in compliance with requirements and standards.

EDUCATOR | INFOSYS | JUL 2010 – JUN 2012

- Designed and authored SOPs, onboarding guides, training materials, and user documentation for enterprise applications, ensuring alignment with structured writing standards and organizational workflows.
- Played a core role in creating and launching a new Tech Stream named “Mobile Technologies” at E&R, Infosys, which was designed specifically to train employees in Android app development.
- Launched 3 new technical training courses scalable at an organizational level. Authored and maintained comprehensive documentation for three Android development courses: UI development, data handling, and mobile testing modules.
- Developed hands-on project documentation and lab guides, simplifying complex technical concepts into clear, actionable instructions for new employees.
- Managed two training batches of 100 interns each and mentored three internship projects for smaller groups, supporting skill development and project delivery.
- Collaborated with stakeholders and SMEs to validate technical accuracy.
- Created structured assessment content and process documentation for 100+ trainees per batch.
