About Me

Technical writer with 6+ years of experience creating product documentation for SaaS and enterprise platforms. Skilled in translating complex features and workflows into clear, user-friendly content, including knowledge base articles, user guides, release notes, UX copy, and API documentation. Proven ability to own the documentation lifecycle end-to-end, collaborate with product, engineering, and support teams, and use data insights to improve user experience and reduce support dependency.

Experience

Data annotation specialist | Innodata, Chennai

Mar 2026 - Present

- Interpreted complex guidelines and structured workflows, ensuring clarity and consistency across evolving specifications.
- Identified edge cases and gaps in instructions, improving clarity and reducing rework.
- Maintained >99% accuracy while working with dynamic rules and structured processes.

Senior Technical Writer | Lightcast, Chennai

Jan 2026 - Feb 2026

- Led end-to-end migration of API documentation to ReadMe.io, improving developer experience and content discoverability.
- Translated SME inputs into structured, sequential workflows, reducing ambiguity-related errors.
- Streamlined documentation structure and onboarding materials, accelerating new user ramp-up time by ~25%.
- Executed complete handover of documentation assets, repositories, and processes, ensuring seamless transition and continuity.

Data Annotation Specialist | Lightcast, Chennai

Sep 2025 - Dec 2025

- Executed structured annotation tasks with >98% accuracy while adhering to detailed guidelines.
- Conducted quality audits and identified error patterns to improve process clarity.
- Analyzed error patterns and edge cases to refine workflows, improving team efficiency by ~20%.
- Maintained and updated annotation guidelines and tracked quality metrics, improving process consistency and enhancing overall dataset reliability.

- Owned DDLC of 3 products from planning and writing to publishing and continuous improvement aligned with product releases.
- Created and maintained end-to-end product documentation—getting started guides, FAQs, help articles, release notes, blogs, and eBooks.
- Improved search performance of 15+ landing pages using SEO and GEO best practices, leveraging keyword insights from Google Search Console and Ahrefs.
- Boosted Google search ranking of 2 landing pages by over 78%, significantly increasing organic visibility, traffic, and signups.
- Published 50+ blogs and various other written articles.
- Collaborated with product, design, and customer-facing teams to develop comparison sheets, webinar content, and sales enablement materials.
- Partnered with customer success teams to create support-oriented content that enhanced user understanding and self-service capabilities.
- Followed and contributed to editorial and documentation standards to ensure clarity, consistency, and accuracy.
- Monitored documentation metrics including search queries, engagement, and user behavior to improve content effectiveness.
- Developed multi-format documentation (written guides, videos, visuals) improving user understanding and self-service adoption.
- Piloted AI tools in documentation workflows, improving content delivery efficiency by 20%.

 Content Creator & Nutrition Consultant | Fitter

Jun 2023 – Mar 2024

- Created high-engagement, SEO-optimized content, boosting platform visibility through data-driven content strategies.
- Led digital campaigns and client engagement initiatives like influencer collaborations and online workshops which improved retention and efficiency.
- Standardized customer onboarding processes to reduce turnaround time by ~20%.

Content Creator & Nutrition Consultant | Solopreneur

Jun 2022 – Mar 2023

- Conducted A/B testing and performance tracking, analyzing content metrics to optimize engagement and conversion rates.
- Developed engaging educational social media content to build client awareness and promote brand reach.
- Developed structured content workflows, increasing audience growth by ~40%.

- Gathered and documented product requirements, translating them into structured workflows and specifications.
- Created wireframes and user flows to support feature understanding and documentation.
- Collaborated with cross-functional teams to ensure clarity and alignment in implementation.

- Authored training documentation, SOPs, and onboarding materials for enterprise applications.
- Simplified complex technical concepts into clear instructional content for large user groups.
- Collaborated with SMEs to ensure technical accuracy and clarity.
